-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

**A. Claim 13, lines 2-3, it is not clear that a circular cross section of an element/pipe can have “sides”.**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8, 10-13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lofland et al in view of Lopatinsky et al. Lofland et al teaches apparatus as recited including gapped fins 40 having throughholes provided on plate 20, heat pipes 30, and fan 50 centered within the fins (figs. 2, 5 for example). To substitute a cross type fan such as taught by Lopatinsky et al (See fig. 6 for example) would be obvious for creating a better cooling pattern for airflow. In regard to claims 11-12 and 16 note fins 15 in fig. 6 are extending from the base plate at an angle which

would be obvious to design within Lofland et al if desired for a variation of air flow dependent on use. In regard to claim 13, note that as broadly stated at least one side of the pipes of Lofland et al contacts the plate 20 while another side contacts the fins..

Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lofland et al and Lopatinsky et al as applied to claims 1-6, 12-13 above, and further in view of Wang (5583746). The fastening of a fan by a corresponding fan plate would be obvious from Wang for convenient assembly.

***Allowable Subject Matter***

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
